

Qi Chen

Product Designer

UI/UX Design · AI-assisted Prototyping & Delivery

I shape early or ambiguous ideas into coherent digital products, working across product definition, core flows, design systems and delivery. My recent independent practice extends into AI-assisted development, testing and App Store release.

01

Work experience

2026.05 - Present

Independent Product Practice

Independent Product Designer

Independently took Dotto, a relationship-memory iOS app, from product definition and interaction design through AI-assisted development, testing and App Store release.

2025.05 - 2026.04

ZUVI · Morpho

Product Designer / Software Product Manager

I joined Morpho as its product designer, then continued the design work while taking on software product management responsibilities across the UV printer's desktop application and on-device interface.

2024.10 - 2025.04

DeTrip

UI/UX Designer

Remote · Contract

As a contract UI/UX designer at DeTrip, I helped evolve its Web3 travel product from the MVP, working across hotel booking, corporate travel and experimental Self-hosting concepts.

- Established the brand's visual identity, defining the logo, UI style, media kit and a distinctive neumorphic design language.
- Streamlined key OTA workflows across search, booking and payment to improve usability and engagement.
- Designed the corporate travel management system for booking, approval and user administration.

2022.10 - 2024.07

Valyuu

UI/UX Designer

Remote · Full-time

As Valyuu's sole designer, I was responsible for design across the complete product line.

- Led the functional and UI/UX overhaul from MVP to version 2.0, participating from feature definition through final development delivery.
- Designed and optimized website banners and marketing emails for ongoing campaigns.
- Designed the UI/UX for the Business to Valyuu Portal.
- Designed the standalone partner site with Ben and the embedded iframe trade-in flow for Ben's website.

01

Work experience · continued

2021.09 - 2022.11	Shopee UI/UX Designer	I was responsible for UI/UX design across Shopee Listing products, including internal admin tools, B2B products and consumer-facing experiences. - Designed the Shopee product-relationship administration platform and product price-comparison platform. - Independently designed the Shopee Dropshipper platform. - Optimized the product-management system in Shopee Seller Center.
-------------------	---------------------------------	--

02

Earlier experience

2020.09 - 2020.11	ChiefClouds UX Intern	I contributed to interaction design and product-flow refinement for CRM and smart shopping systems for Carlsberg, Hisense, Boehringer Ingelheim and ChiefClouds' standard company products.
2019.02 - 2019.05	NetEase Games UX Intern	I participated in the design process for mobile game interfaces. - Created daily game-event prototypes and interaction documents for Onmyoji Arena. - Maintained and updated the company's internal WeChat official account.

03

Education

2019.09 - 2021.08	TU Delft Master	I completed a Master's degree in Design for Interaction, deepening my understanding of user-centered design principles and innovative problem-solving techniques.
2015.09 - 2019.06	Hunan University Bachelor of Industrial Design	I gained foundational design knowledge during my undergraduate studies, laying a solid foundation for my transition into digital product design.

Capabilities

- Product definition and strategy
- UX and UI design
- User research and validation
- Design systems
- AI-assisted product development
- Cross-functional delivery
